All AI Donor Sires recorded prior to 01/07/07 owned by active ARPCBI financial members will be classed as Control Sires. Registered owners of Control Sires may apply to the National Executive to have their sire listed as an AI Donor Sire.

Before calves can be registered as having been got by A.I. from a Control Sire not presently registered as being owned by the person desiring registration of the calf, it shall be accompanied by a Certificate of Approval for Registration issued by the owner of the said sire indicating that all fees and conditions prescribed by the owner of the said donor sire have been complied with. The owner of a Control sire may apply to the ARPCBI for the issue of such Certificate of Approval for Registration which he may then if desired sell to a person desiring registration of a calf got by A.I. from semen of the said donor sire.

Any member applying to register calves got by A.I. sired by a Control Sire shall submit -

➤ Where applicable, the Certificate of Approval for Registration from the owner of the Control Sire.
